

FF-AR 0.4/0.6

Sub Zero Flake Ice Machine

230v 1 Phase 50Hz

The FF-AR series sub zero flake ice machine are designed using advanced technology, with highly economical energy consumption, excellent performance and ease of operation.

The FF-AR series uses advanced computer technology to control the ice making process. The PC board controls and monitors the functionality of the ice machine, allowing for easy diagnosis of any problems that may occur.

Ice is produced at – 9 degrees, from a static vertical evaporator, completely sealed, with minimum maintenance required for the lifetime of the machine. The evaporator is made of high quality, low temperature alloy steel, which increases the heat exchange efficiency and reduces the energy consumption of the machine.

The FF-AR Flake ice machines can be fitted on a wide range of storage options depending on the customer's requirements.

The FF-AR machine is extremely versatile and is used in a wide variety of applications, including: Seafood, Meat Processing, Poultry, Supermarkets and Mining.

Warranty: 12 months parts and labour, 5 years on evaporator assembly.
